Contact Lens Fitting Acknowledgement of Fees

*****Please bring this original signed document with you to your fitting appointment*****

Patient Name: _____ Date: _____

Acknowledgement you received this information. Signature _____ Date _____
Email address: _____

Fittings for New Contact Lens Wearers: New wearer fitting appointments are approximately one hour. The prospective wearer will be taught proper insertion, removal, cleaning, wear and care of the lenses. We will confirm a proper fit and check visual acuity to ensure the best visual outcome. Trial lenses will be sent home to use for a trial period upon successful insertion and removal. If you are a new wearer of any *custom or specialty lens*, this fitting process usually requires more than the allotted hour and may require additional follow up appointments. _____ **Initial**

Fittings for 18 and under: Fittings can be challenging for children and teens. We need their full attention for the first portion of this appointment to get the best results. Your child will benefit most by attending this portion of the appointment without friends, siblings and parents ensuring there is not a distraction. Once we have completed the insertion and removal process successfully, parents are invited to join us while we educate about lens wear and care details. _____ **Initial**

All New Wearers: *Require* a follow up appointment within 1-2 weeks after initial fitting to ensure the cornea remains healthy after contact lens wear, confirm proper fit and ensure you have the best acceptable visual outcome and make adjustments as needed. _____ **Initial**

Fittings for existing wearers: When there are changes to your contact lens prescription, a contact lens fitting is required. Sample lenses will be sent home to use for a trial period. A follow up appointment may be needed to ensure the cornea remains healthy after contact lens wear, confirm proper fit and ensure you have the best acceptable visual outcome. _____ **Initial**

Specialty or Custom fittings (New or Existing wearers): Includes BioColors, toric, mono-vision, multifocal and toric-multifocal lenses. These appointments generally require additional time and tend to be longer than the allotted hour. This additional time allows the lenses to settle into place and/or for you to adapt to the different optics in any of the listed lenses. _____ **Initial**

******Fitting Fees Are Due at the Time of Appointment******

- **New Lens wearers: \$100 - \$200.** This includes two additional follow up visits within 90 days.
- **Existing Lens wearers: \$60 - \$100.** This includes two additional follow up visits within 60 days.
- **Specialty or Custom Lens wearers: \$100 - \$150.** This includes three additional follow up visits within 90 days. *Custom lens trials are \$25 per initial trial & \$9.95 shipping. This includes one exchange within 60 days. When RX is finalized, payment by credit card is expected at the time of order.
- **Additional follow up appointments** will be charged **\$30 - \$60** per appointment. _____ **Initial**

Appointment Date: _____ Time: _____ am /pm

Please give a 24 hour notice if you are unable to keep your appointment. (615) 297-6591

Contact Lens Fitting Policies

*****Please bring this original signed document with you to your fitting appointment*****

Contact lenses are intended to help your vision. They are considered a medical device that can change the curvature of the eye and must be checked by a medical professional. An annual examination is required in order to continue contact lens wear. A *contact lens prescription expires one year* after your last annual examination. Glasses are strongly recommended as a back-up if contact lenses are not available or if you experience an ocular infection or trauma.

Soft contact lens fitting types:

- Single vision- distance only fitting
- Specialty or Custom fitting:
 - Toric fitting (allows you to see at distance and corrects astigmatism)
 - Mono-vision fitting (allows you to see with distance and near with one for each)
 - Multifocal (allows you to see both distance and near with both eyes)
 - Multifocal Toric (allows you to see distance, near and corrects astigmatism with both eyes)
 - Some *Specialty and Custom* lens trials require 3-weeks delivery time.

Trial lenses

- Additional trial lenses may be distributed to help determine comfort and vision.
- Trial lenses are strictly reserved for patients who are scheduled for a fitting appointment and who order through our website.
- Trial lenses are no longer dispensed at your annual exam.

Purchasing

- After a successful fitting, contact lenses may be purchased through our website, www.nashvillevision.com and will be shipped directly to you.
- When you purchase an annual supply through our website you will be able to take full advantage of any discounts, promotions, rebates and free shipping.
- Ground shipping fees are \$8.00 for orders not placed online & \$9.95 for custom orders.
- Most orders can be expected within 5-7 business days.
- Expedited shipping options are available and range between \$15- \$30.
- If your lenses are custom or on backorder from the manufacturer there is a three week delay.
